## TREATING SUN DAMAGED SKIN

Apothecary Spa & Boutique sends its warmest greetings as we move into the autumn season. In this edition of the newsletter you will find special tips from Apothecary on how to combat damage from the summer sun and the pore-clogging effects of sunscreen products. Read on to learn about our most current specials and promotions!

### A Message from Apothecary

Using sun protection (sunscreen/sun block) on your face is essential year round. Don't forget to use it when vacationing in sunny climates because sunburn is the primary cause of wrinkles, spots and blemishes.

Vitamin C is vital to the health of your skin. To make sure your body is getting enough of it, be sure to eat fruits and vegetables rich in Vitamin C. You can also take vitamin supplements or use topical products such as iS Clinical's C-15 Serum (\$68) and BioMedic's Potent C 10.5 Concentrate (\$63) offered at Apothecary Spa & Boutique.

Apothecary Spa offers a variety of solutions to treat sun damaged skin. Below you will find further information about these helpful treatments.

### Prescription Facial with Microdermabrasion \$100\* (Reg. \$125)

Microdermabrasion is typically used to treat a variety of skin conditions including hyperpigmentation (discoloration), enlarged pores, acne scars, and stretch marks. In this non-surgical procedure, tiny crystals are vacuumed across the surface of the skin, removing dead skin cells and resurfacing the skin. Over time, clients can expect to see a general refinement of the texture and appearance of the skin. During the course of treatment, clients should remember to apply sun protection regularly. The failure to do so may lead to undesirable results such as further discoloration of the skin. Although Microdermabrasion is most commonly used on the face, it is also effective on other parts of the body including the back and décolleté areas.

### Vitamin A Peel \$160\* including pre and post peel kit (Reg. \$185)

This "overnight" peel safely uses L-RetinolA™ to significantly stimulate cell turnover resulting in smoother, denser and more hydrated skin. It works well for large pores, fine lines, scarring, sun-damaged skin and hyperpigmentation. Pre and Post peel kits are required.

### Lightening with Photo Facial \$225 (Reg \$250)

Intense Pulse Light, targets sun damage, age spots and facial blood vessels. Treatment also includes a full clinical facial appropriate for your skins needs. A series of treatments is recommended.

As a special gift, newsletter readers are eligible for a 10% discount on any of the products mentioned in this issue!\* (print this out and bring it with you to receive discount)

\*Offers valid through 10/15/07 and may not be combined with any other coupons. Please mention the newsletter promotion when booking your appointments.
